ANTIPODI

design by STUDIO SALARIS

La collezione Antipodi deve il suo nome all'accostamento di opposti che, uniti, creano un insieme unico e armonico. È una collezione outdoor&indoor con una forte connotazione grafica. Ogni pezzo è progettato per sottrazione, riducendo al minimo il numero degli elementi del loro archetipo.

Realizzata in finitura a polveri nera opaca ruvida e corda Talpa 5 mm tonda nella versione standard, è disponibile in altri colori e finiture.

The Antipodi collection owes its name to the combination of opposites that, united, create a unique and harmonious whole. It's an outdoor&indoor collection with a strong graphic connotation. Each piece is designed by subtraction, minimizing the number of elements of their archetype. Made with black doff powder coated metal and cord gray colour 5 mm in standard version, is available in other finishing and colours.

CAPRICCIO

BAMBOO AND NATURAL RATTAN FINISHING

Capriccio è una collezione leggera come i materiali che utilizza: la canna di Malacca, delicato e allo stesso tempo robusto; il rattan naturale e la corda sono invece l'intreccio che regge queste strutture ariose. Tutti gli arredi lasciano vedere la loro struttura, sempre curva e morbida, senza rinunciare alla solidità e al comfort dato dal design ergonomico e aiutato dalla presenza dei cuscini per divani e sedute. Il dettaglio della corda blu, usata per caratterizzare i punti di giunzione, è il "capriccio" che dà il nome alla collezione.

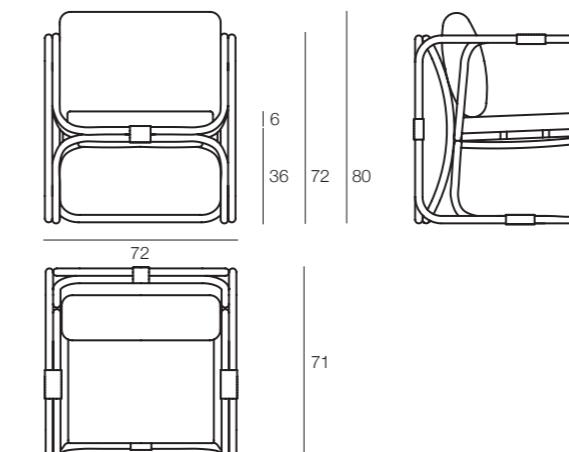

Capriccio is a collection as light as the materials it uses: the rattan pole, delicate and at the same time robust; the natural rattan skin and the rope are the braiding that supports these airy structures. All the furnishings show their structure, always curved and soft, without sacrificing the solidity and comfort given by the ergonomic design and helped by the presence of cushions for sofas and seats. The detail of the blue rope, used to characterize the junction points, is the "whim" that gives its name to the collection.

CAPR0293

CAPR0293

DETTAGLI CHE FANNO LA DIFFERENZA - ACCENT DETAILS

La corteccia della canna di Malacca viene tradizionalmente usata per assicurare tra loro le diverse parti della struttura degli arredi in midollino. Per impreziosire la collezione Capriccio, questo dettaglio è stato sostituito con corda colorata, disponibile in diverse colorazioni e melange.

Rattan skin is traditionally used to fasten the different parts of natural wicker furniture.

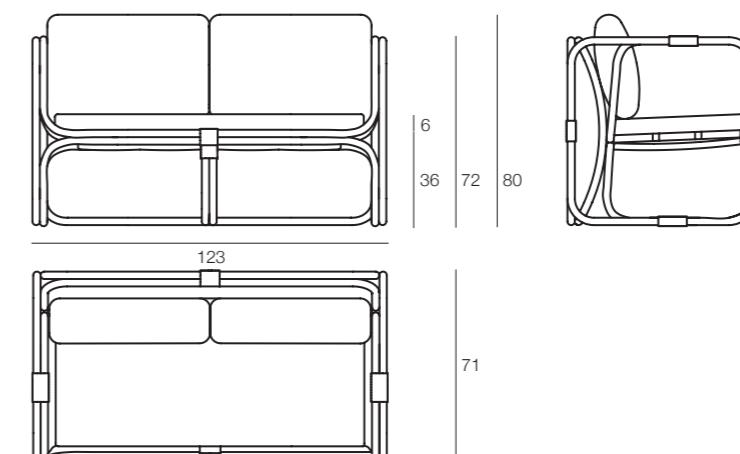

To enhance the Capriccio collection, this detail has been replaced with coloured rope, available in different colours and melange.

CODE

full collection: VIAGGIO TROPICALE

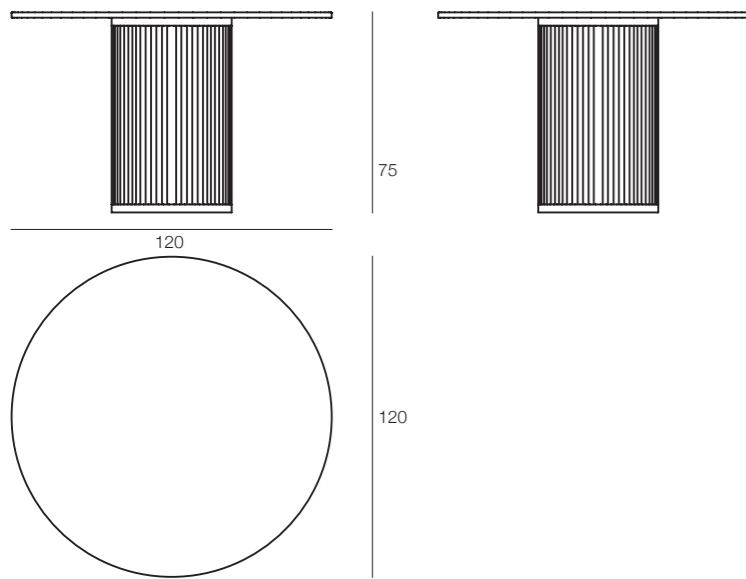

Struttura in legno di teak con finitura standard Fine Sanded a levigatura fine. I listelli in teak sono disposti in modo non simmetrico, con alcuni listelli più vicini tra loro e altri più lontani: in questo modo viene ricreato l'effetto del "codice a barre" (bar code) da cui la collezione trae il nome. I piani dei tavoli sono in marmo bianco, disponibile in varie forme e dimensioni a seconda del modello, o in teak.

The line is composed by pieces of furniture with a Fine Sanded teak wood structure. The teak slats are positioned in an asymmetric way: some of them are closer each other and some other are farther to create a "bar code" effect, after which the collection is named. The table tops are in teakwood or in white marble and are available in different shapes and dimensions, according to the model.

CODE0487

CODE0487

CORD

designed by CRS SILAT

La collezione Corda unisce la corda intrecciata, materiale che le dà il nome, con l'inimitabile teak, il legno perfetto per l'arredo outdoor e per il giardino, modellato in modo da essere leggermente curvo, quasi arcuato. Il look è classico, ma l'uso della corda rende la linea moderna e robusta, comoda e confortevole. Realizzata in Teak finitura oliata intreccio in corda color cenere.

The Corda collection combines the braided rope, the material after that it is named, with the inimitable teak, the perfect wood for outdoor furniture and for the garden, shaped to be slightly curved, almost arched. The look is classic, but the use of rope makes the line modern and robust, cosy and comfortable. Oiled teakwood frame and ash woven rope.

DESIRE

designed by CRS SILAT

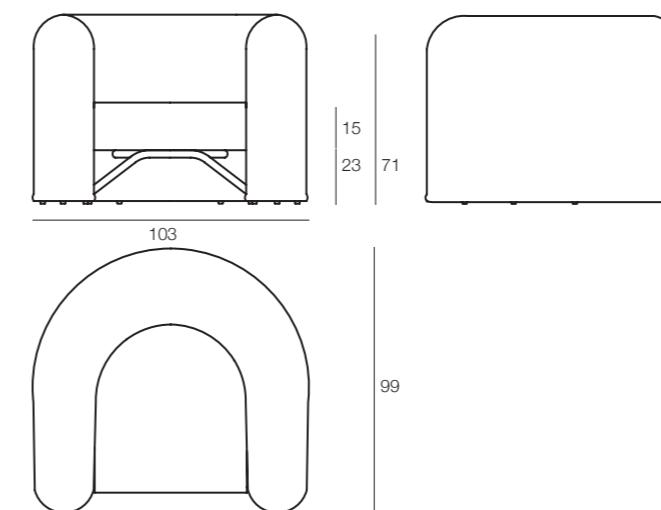

Desire è una collezione interamente in rattan, un materiale versatile e senza tempo. Tutti gli arredi sono costruiti su una struttura fitta e regolare: il rattan forma una sorta di "armatura" che diventa accogliente nella poltrona e crea un assetto forte negli altri arredi, dando vita a un design che amerete al primo sguardo, un vero oggetto del desiderio

Desire is a collection entirely made in rattan, a versatile and timeless material. All the furnishings are built on a dense and regular structure: the rattan forms a sort of "armor" that becomes cozy in the armchair and creates a strong setting in the other furnishings, giving rise to a design that you will love at first glance, a true object of desire.

JENGA

designed by STUDIO SALARIS

Jenga è una collezione di tavolini e sgabelli ispirata ai tradizionali giochi in legno impilabili e in lingua swahili significa "costruisci": un nome perfetto per una collezione di tavolini dal design inedito, dove le forme scultore e minimali, scavate nella materia, non sono altro che una ripetizione di moduli che si sovrappongono ritmicamente. Proposto in Suar finitura oliata.

Jenga is a collection of tables and stools inspired by the traditional stackable wooden games and in the Swahili language means "build": a name perfect for a collection of tables with an original design, where the sculptural and minimal shapes, carved into the material, are nothing more than a repetition of modules that overlap rhythmically. Proposed in oiled wood finishing.

PALEOLITICA

designed by STUDIO SALARIS

I vasi decorativi in legno di Teak della linea Paleolitica richiamano i primi manufatti prodotti dall'uomo, la loro semplicità e bellezza. Attraverso forme pure e primordiali, scavate fra le irregolarità, investigano l'assenza di materia che la radice porta con sé. Le molteplici forme e dimensioni fanno sì che questi complementi siano perfetti per ambienti e spazi molto diversi, nessun oggetto è perfettamente uguale all'altro e ogni pezzo è realizzato a mano presentando caratteristiche di unicità. Proposti in finitura protettiva o legno nero vulcanizzato.

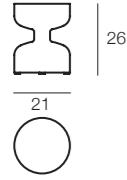

PHOEBE

designed by STUDIO SALARIS

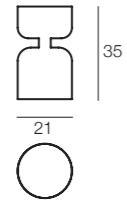

Phoebe è una collezione in legno di Suar: tavolini dalla peculiare forma "a clessidra", caratterizzati da una vita sottile in centro che permette di spostarli con facilità, oltre ad essere estremamente accattivante per il suo look insolito ed elegante. Il legno conserva tutta la sua materialità, mentre le forme curve donano eleganza e morbidezza all'insieme. Disponibili in diverse misure e simmetrie. Proposto in finitura oliata.

Phoebe is a Suar wooden collection: tables with a peculiar "hourglass" shape, characterized by a slim waist in the center that allows you to move them easily, as well as being extremely eye-catching for its unusual and elegant look. The wood preserves all its materiality, while the curved shapes give elegance and softness to the whole. Available in different sizes and symmetries. Proposed in oiled finish.

SERENGETI

designed by CRS SILAT

La linea Serengeti deve il suo nome al grande parco africano: il suo legno di teak è finito in modo da dare un effetto naturale, con un aspetto simile a quello dei tronchi d'albero e dei rami. L'altro materiale che caratterizza gli arredi Serengeti è la corda in Giacinto d'acqua sintetico, usato al naturale o ritorta.

The Serengeti line owes its name to the great African park: its teak wood is finished to give a natural effect, with an appearance similar to that of tree trunks and branches. The other material that characterizes the Serengeti furnishings is the synthetic water hyacinth rope, used natural or twisted.

TEA TIME

designed by STUDIO SALARIS

Questa collezione in legno di Suar è declinata in tre tavolini di varia misura che possono essere usati insieme o singolarmente. Il nome deriva dalle piccole maniglie che, come per i vassoi dei più eleganti high tea anglosassoni, sono allo stesso tempo decorative e funzionali. La forma rastremata e raggiata è tornita a partire da un unico blocco di legno. Proposti in Suar finitura oliata.

TETI04F8

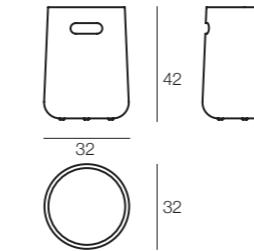

TETI04F9

TETI04G1

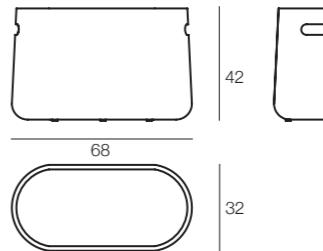

This Suar wooden collection is available in three tables of various sizes that can be used together or individually. The name comes from the small handles that, as for the trays of the most elegant Anglo-Saxon high tea, are at the same time decorative and functional. The tapered and rounded shape is turned from a single block of wood. Standard finish is oiled wood.

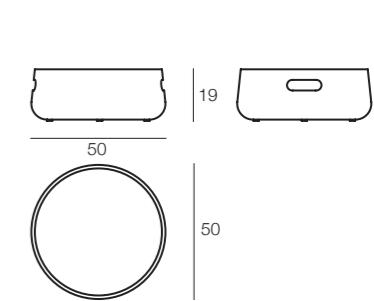

TETI04F8

TETI04F9

TETI04G1

VENEZIA

ADDENDUM full collection: CATALOGO GENERALE

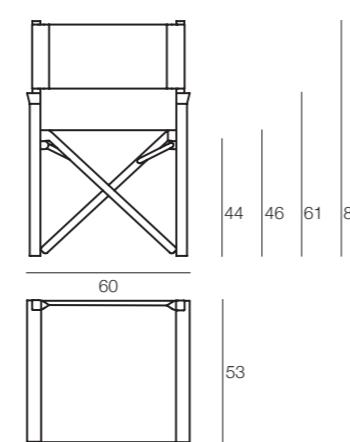

Ad eccezione dei divani l'intera collezione è costituita da elementi pieghevoli caratterizzati da ingombri minimi quando chiusi. Le sedie regista sono in legno di Teak con seduta e schienale in tessuto Ecrù, così come la tela della sedia tripolina che può essere richiesta in versione normale a strato singolo oppure con imbottitura. Ferramenta in acciaio ed ottone cromato. Il legno è proposto in finitura a levigatura fine naturale.

The shape of canvas can be chosen from single layer or padding. Except the sofas, the whole collection is entirely composed of collapsible elements taking up very small space when folded. The director's chairs and Tripolina deck chair have wooden structure with seat and back in ecru fabrics. Hardware in stainless steel and chromed brass. The standard finishing for the Teak is Fine Sanded.

STUDIO SALARIS

Studio Salaris nasce a Milano città del design, nel cuore del centro storico di Brera.

A fondarlo è Alessandra Salaris che, dopo gli studi classici, si dedica all'interior design presso lo IED, a Londra e al Politecnico di Milano dove consegue la Laurea. Diverse sono le esperienze di lavoro in Italia e all'estero. Un master in comunicazione e marketing si rende indispensabile per meglio capire le dinamiche aziendali con le quali intende confrontarsi professionalmente.

Con esperienza più che decennale si confronta con le più importanti riviste e aziende, famose a livello sia nazionale che internazionale. La volontà è di offrire un supporto individuale e fortemente personalizzato aiutando i clienti ad esplicitare esteticamente, nella forma migliore, la loro intrinseca identità aziendale.

La *mission* è dare un contributo personale e riconoscibile che non sovrasti la vera anima e la storia delle aziende cliente.

Studio Salaris was born in the historic centre of Milan, capital of design.

Founder Alessandra Salaris topped her classical education with the study of interior design in London and Milan, where she attended IED and graduated from Politecnico di Milano. She later earned a Masters degree in Marketing and Communication to better understand the challenges of the business she faces everyday. As of today, she has worked internationally.

In the past decade she has collaborated with the top magazines and companies of the industry.

Her ambition has always been that of delivering a customized support to help her clients achieve an aesthetic expression of their brands.

Her *mission* is to give a personal and recognizable contribution that enhances the clients' story and core values.

FINITURE

FINISHING

Tutti i manufatti lignei vengono prodotti con legno certificato e sottoposto a rigorosi controlli sia interni che da parte delle autorità competenti, lungo tutto il processo produttivo dalla piantagione alla consegna, secondo la rigida normativa europea FLEGT. Il legno utilizzato è legno di Teak della migliore qualità, disponibile nelle finiture 'Fine Sanded', ossia levigatura fine, 'Oil & Wax' eseguita con olio e cera, 'Java Brown' caratterizzata dalla pigmentazione scura color testa di moro, 'White Wash' e 'White Sand' dall'effetto decapato.

Per le collezioni Jenga, Phoebe, Suar viene usato legno massiccio tropicale di Suar. Proposto con levigatura grezza e finitura ad olio.

All the wooden manufactured products are made of certified wood accurately controlled both by our staff and by the competent authorities during the entire production, from plantation to delivery, in compliance with the FLEGT strict European regulations

Wooden collections are made with the best quality teak wood available in different finishes: 'Fine Sanded', 'Oil & Wax', 'Java Brown' characterized by dark brown pigmentation, 'White Wash' and 'White Sand' with pickled effect.

Items of Jenga, Phoebe and Suar collections are made of Suar tropical hardwood with raw sanding and oil finish.

FINITURE

L'acciaio inossidabile è una lega ferrosa che, grazie al contenuto di nichel e cromo, è molto resistente alla corrosione. L'alluminio viene utilizzato per creare le strutture interne dei mobili in rattan: preventivamente trattato e verniciato per una migliore protezione agli agenti atmosferici, viene successivamente utilizzato come supporto per l'intreccio della fibra sintetica. Per l'uso esposto vengono utilizzati tubolari di alluminio vergine oppure acciaio dolce sottoposti a bagni di pulitura e verniciati a polvere.

Per gli intrecciati sono impiegate fibre sintetiche a base polietilenica che hanno qualità uniche di resistenza ai raggi UV, di riciclabilità e di resistenza agli sbalzi di temperatura. Inoltre non necessitano di manutenzione e sono insensibili a funghi e parassiti.

Per gli arredi della collezione Antipodi viene usata una struttura in metallo con finitura a polveri nera opaca ruvida e corda talpa 5 mm tonda.

La corda utilizzata negli intrecci è una corda in polipropilene o in acrilico, da molto utilizzata nel campo nautico, presenta un'alta resistenza all'abrasione ed ai raggi UV mantenendo un carico di rottura molto alto che la rende idonea alla produzione di arredi esterni di altissima qualità anche per uso contract.

Agli articoli in fibra naturale viene applicata una finitura trasparente protettiva. E' comunque consigliato l'uso all'esterno non coperto.

I piani in vetro hanno differenti bordature a seconda del modello e sono disponibili trasparenti, satinati, o fumè.

Il Batyline® è un tessuto che combina l'eleganza delle fibre naturali con la performance del tessile industriale.

Gli imbottiti standard sono in poliuretano a densità differenziata, disponibili su richiesta imbottiture drenanti o a cella piena. I tessuti standard a rivestimento della cuscineria sono in acrilico colore ecrù.

Su richiesta possono essere usati tessuti colorati Sunbrella® o di altro tipo a scelta del Cliente.

FINISHING

The stainless steel is a ferrous alloy that, thanks to nickel and chromium, is highly corrosion-resistant. Aluminium is used for the internal frames of the rattan furniture. It is previously treated and painted to better resist to weather conditions and then used to bear the synthetic fiber weave. Cleansed and powder coated tubular virgin aluminium or steel structures are employed for an exposed use.

The polyethylene based synthetic fibers used for the woven collections have unique UV ray resistant qualities, can be recycled and boast a good resistance to changes in temperature. Moreover they do not need any maintenance and are insensitive to fungus and parasites.

Items of Antipodi collections are made of black powder coated metal and cord grey color 5 mm. The ropes used for the weaving are specific for outdoor use and made from a synthetic material (Acrylics or polypropylene) that is highly resistant to UV rays, abrasion and has a really high broken point. These will ensure an extremely functional and comfortable woven seat and backs ideal for high quality outdoor furniture also in a contract environment.

Natural fibers items are protected by a transparent, semi-glossy finishing. It is anyway suggested not using it in an uncovered outdoor space.

The glass tops have different edges according to the model and are available in transparent, satin or smoke-grey version.

The technical fabric Batyline® combines the elegance of the natural fibers to the performance of the industrial fabric.

The standard upholstered are made of low/high density polyurethane foam or flow-through foam on customer's request.

On customer request can be used coloured Sunbrella® fabrics or other brands.

MAINTENANCE

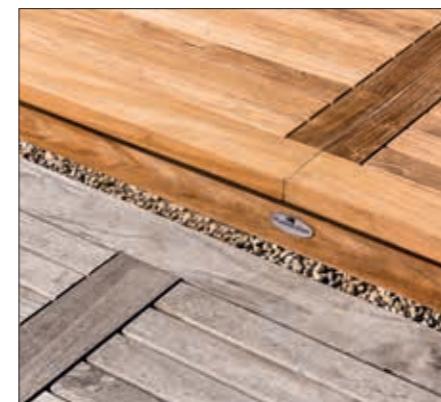

Il legno è un materiale 'vivo' che, in relazione al luogo in cui viene posizionato, può richiedere una particolare manutenzione. Con l'applicazione dell'olio e della cera, il Teak risulterà perfettamente protetto e ravvivato nel colore. L'olio per Teak può essere usato su legno grezzo come unico e completo agente protettivo, oppure su legno già trattato, purchè preventivamente pulito, come prodotto per la manutenzione. La cera fornisce uno strato protettivo ulteriore, pressoché invisibile, che riduce la penetrazione di macchie di oli e liquidi sulla superficie del legno. Si tratta di una cera in pasta di colorazione neutra, costituita da una miscela di elementi naturali selezionati tra cui cera d'api, cera carnauba ed essenza di trementina. I kit di manutenzione de Il Giardino di Legno sono ideali per lucidare e proteggere i mobili e gli oggetti in legno di Teak.

Wood is a "living" material which, depending on where it is placed, can require a particular maintenance. The Teak wood will result perfectly protected and brightened up the colour applying oil and wax. The oil for teakwood can be used on raw wood as single and complete protective agent or on already treated wood, provided that it has been cleaned before, as maintenance product. The wax provides a further protective layer, almost invisible, avoiding the food, oil and liquid stains to seep through the wood surface. It consists of a colourless wax paste, made of a mix of selected natural elements among which beeswax, carnauba wax and turpentine gum. The maintenance kits by Il Giardino di Legno are suitable to polish and protect teakwood furniture and objects.
