ITALIAN EXTERIOR DESIGNERS SINCE 1978

Unopiù, company leader in the production and distribution of design furniture and accessories for the outdoors, was founded in the heart of Tuscia over forty years ago.

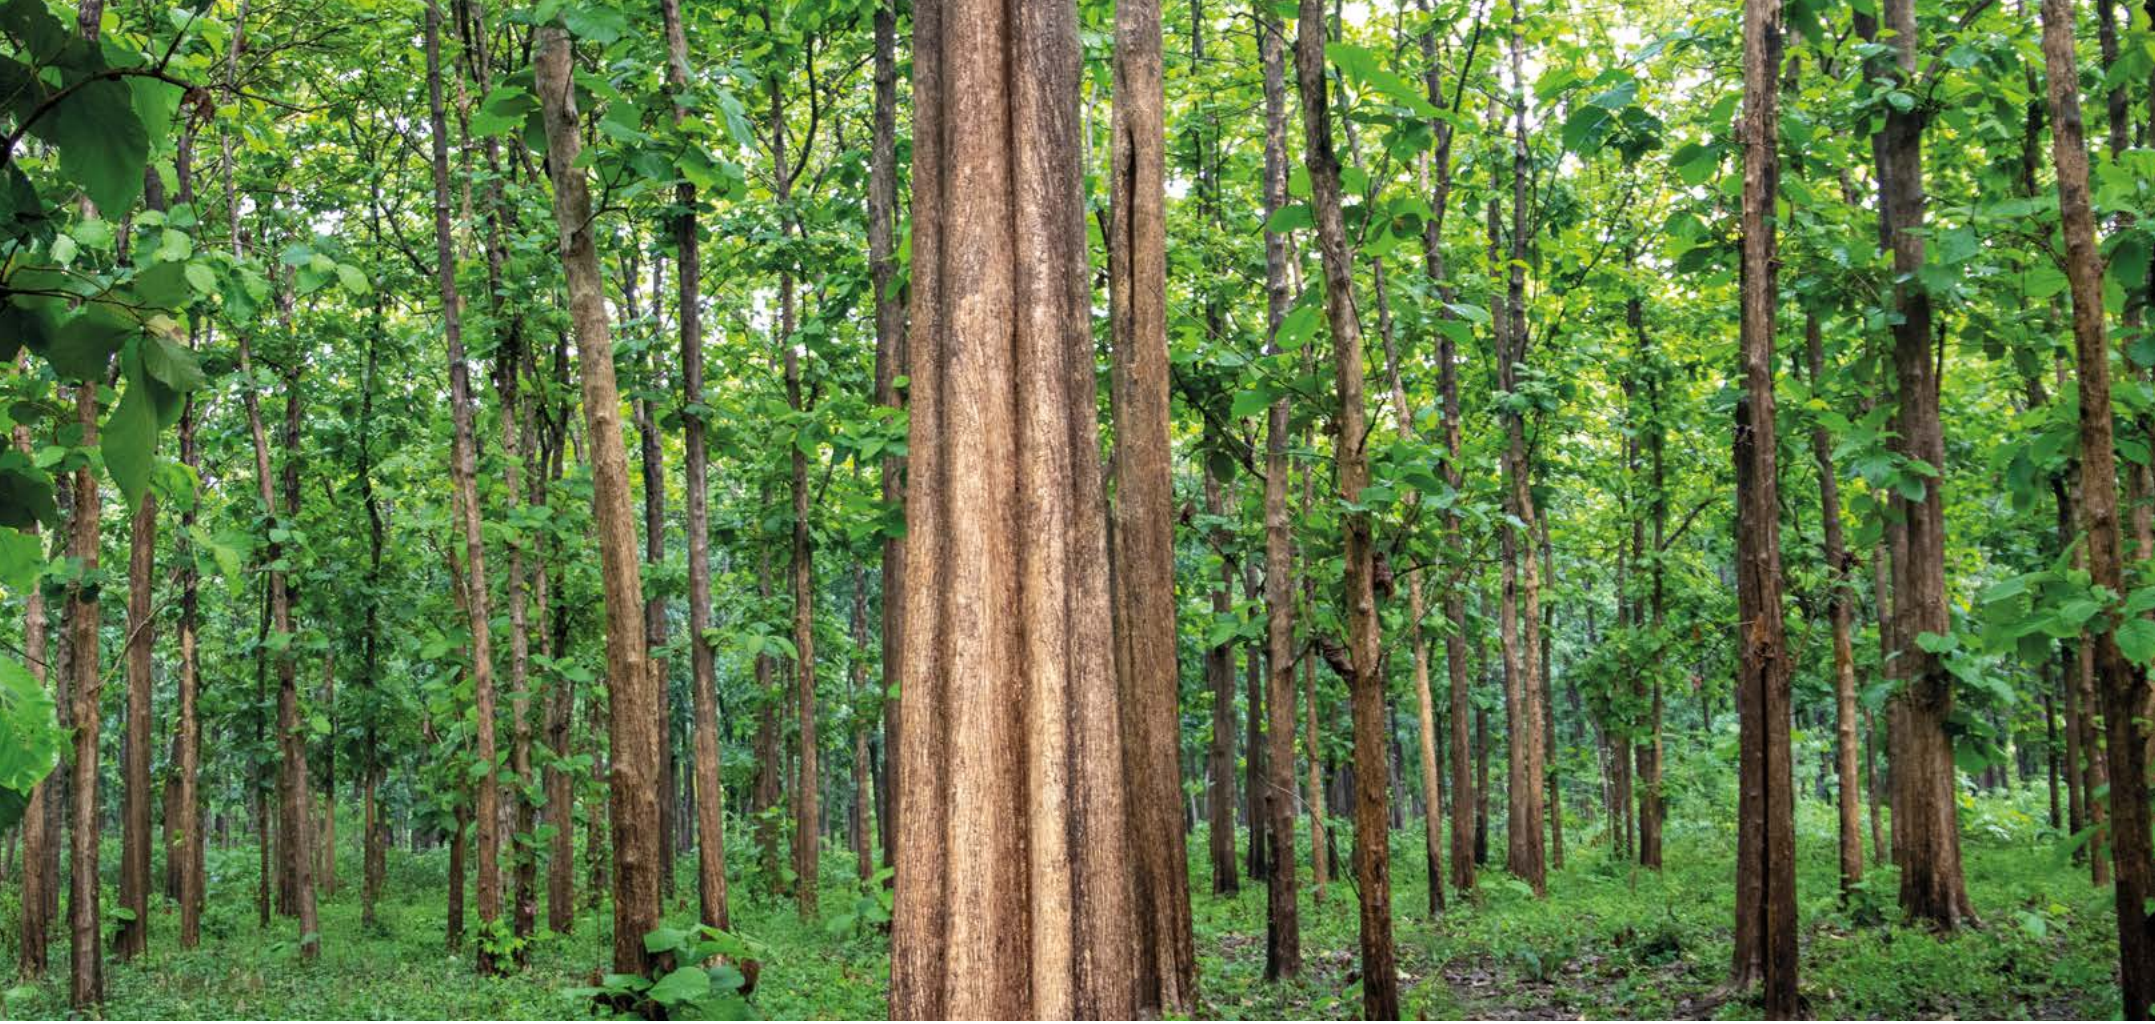
The company mission is to furnish every outdoor area of the home with the same care and passion as is dedicated to the indoors, conceiving and creating elegant functional areas where relaxing inspirational moments may be enjoyed in true Italian style.

The company offers a “total look” for any type of ambience, from the urban balcony to the grand gardens of great villas.

Thanks to complete collections of furniture, structures and accessories, Unopiù can satisfy any style requirement the customer may have, from the most traditional design to the most modern.

All Unopiù creations are made to last, without losing any of the technical or quality characteristics that have become the company trademark.

Materials are selected for their unrivalled quality and resistance to weather conditions, even the most extreme.



SUSTAINABILITY

Teak has always been the preferred material for the creation of outdoor furniture, thanks to its excellent robustness and resistance to weather conditions. We use the best “A Grade” quality teak, fully respecting eco-sustainability procedures.
Moreover, the top quality materials used make Unopiù products a sustainable choice for longlasting furniture.

Teak is probably the most eco-friendly material used in the outdoor furniture industry: it is not only recyclable but also truly renewable. Suffice to plant a seed and nature will see to the rest. Besides, while a teak tree grows it also converts the planet’s carbon dioxide into precious oxygen. Unopiù purchases all its teak furniture in Indonesia, the nation that has the biggest and oldest certified teak plantation in the world. These

"design objects for a lifetime"

plantations are the property of the Indonesian government and are the nation's main source of employment.
Teak is cultivated just like any other crop: harvesting and replanting are carried out in unison to guarantee that the plantations, initially established in the late 1800s, remain a source of renewable revenue for future generations.

Treedom

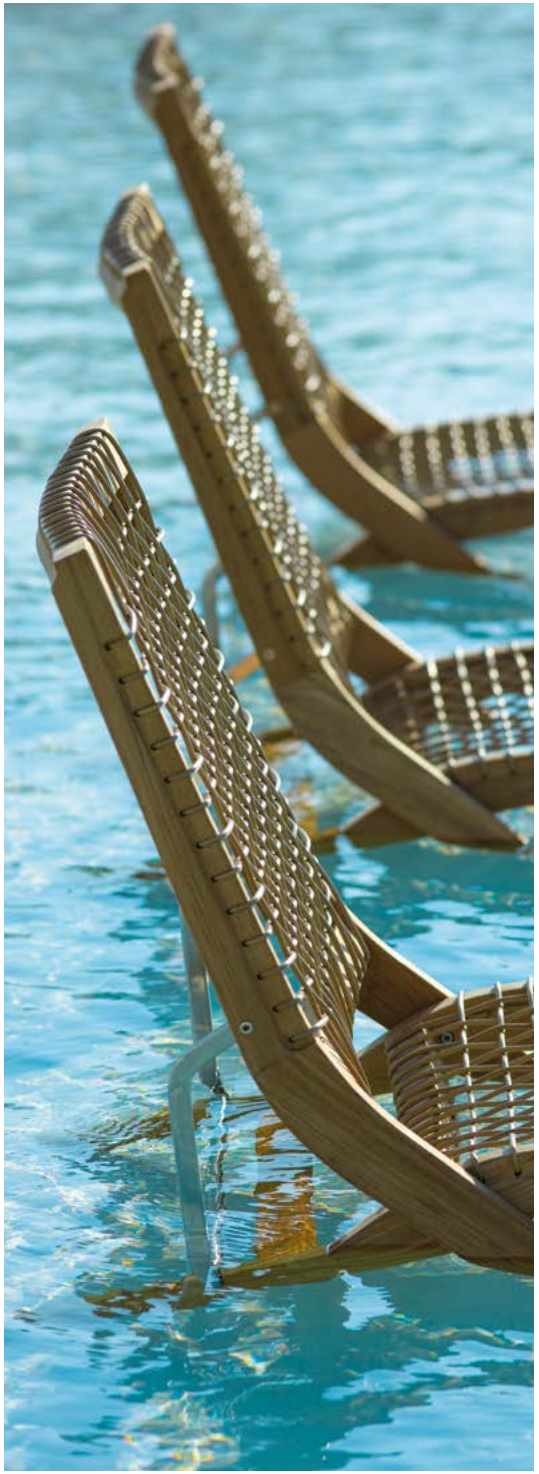
For the company the protection of nature and the environment not only begins with the use of teak from certified plantations, but also with the creation of a reafforestation project in collaboration with Treedom. A clear vision for a definite plan that has seen 300 cocoa trees planted in Cameroon in 2020.
In the future Unopiù will continue to protect the environment making concrete efforts with new reafforestation projects around the world: a small but solid contribution to lower CO2 emissions while encouraging and supporting local economies.

treedom®
let's green the planet

Fischbacher

The new Unopiù Velluto fabrics are a unique line and are the result of research into recycling plastic by the Fischbacher company. This noble collection of top of the range cushionware on demand for sofas, armchairs and sunloungers comes in 14 different shades, all extremely elegant and beautifully refined. A true velvet, warm, delicate and extremely soft to the touch, where 70% of the thread used in fact comes from recycled PET bottles. Thus a top quality ecological product has been created that withstands outdoor conditions including light, is flameproof and suited to any environment, whether outdoor or in, public or private.

”We all have the power to make the planet a better place”

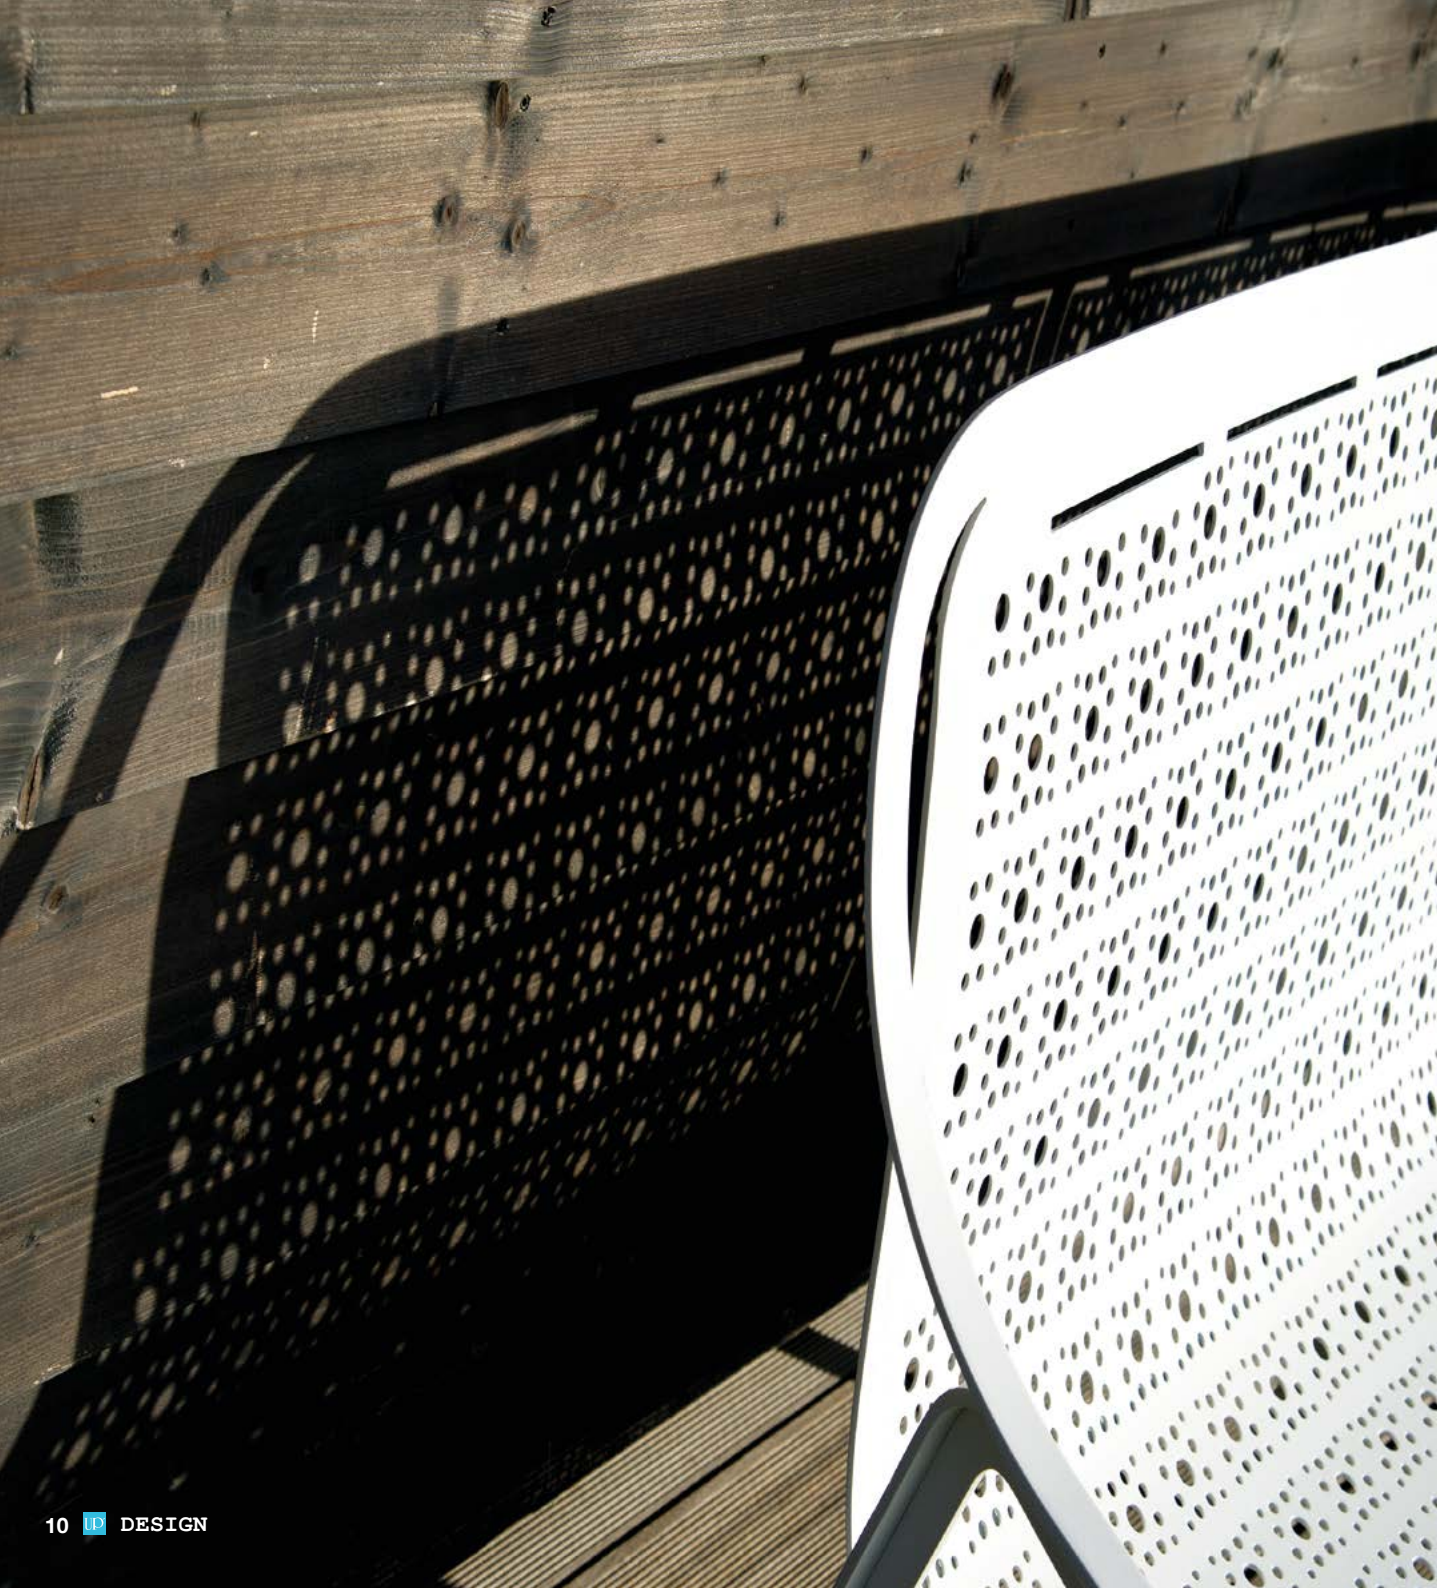


“designing a product means imagining a relationship with its user”

DESIGN

For Unopiù, to design and develop projects means to interpret the history and evolution of outdoor living in Italy and Europe, representing the stylistic soul and raw materials that have distinguished the company over the years. Being contemporary nowadays means understanding the project tensions of today while not forgetting that when we speak of rapport with outdoor areas, our roots and traditions must not be overlooked. It is for this reason that all of our collections are created with a precise DNA, consistent with the forty year plus Company history.

All Unopiù products are designed by qualified professionals from the Company's Research and Development Department, or are signed by important designers who have collaborated with Unopiù over the years like Adam Tihany, Ferruccio Laviani, Meneghello Paolelli Associati, Michele Bönan, Paola Navone, Marco Acerbis, Matteo Thun, Andreucci & Hoisl, Carlo Martino, Studio Adolini and Marco Piva. They are all famous designers and professionals in the field who have consistently interpreted the spirit of the Company with class and originality. A special art of living has also emerged from these partnerships that clearly defines Unopiù Style.



Today the Unopiù offer includes both iconic pieces that have made design history, like the Amanda hammock, introduced in 1988 and still today a bestseller, as well as contemporary style furnishings. For example Synthesis, symbol of the fusion of different materials like teak and fibre, or Urbn Balcony, that totally satisfies brand new trends like the requalification of city balconies.

The research and introduction of new materials that adapt perfectly to the design aesthetic as well as to great comfort and user-friendliness are the Unopiù stylistic charter: not just design for design's sake, but design to better the life of the client with innovative user-friendly options.

Elegantly designed furnishings that are comfortable and adaptable simplify our clients' outdoor lives with products of guaranteed durability whose refined design ensures they remain in vogue.

MATERIALS

Today the fusion between outdoor and indoor style is more and more evident, although the outdoor product must seek and use materials with unique characteristics for outdoor durability. Unopiù materials are always chosen for their incomparable quality of resistance to all weather conditions, even the most extreme.

Teak

Teak wood is a material of excellence, famous all over the world for the warm beauty of its surface grain and its excellent physical characteristics. It is in fact a robust, waterproof wood, resistent to salty conditions and the elements. For its furniture production, Unopiù uses only the most valuable and durable teak from Indonesian forests, and only that considered the highest quality from the centre of the trunk. Quality and ecosustainability: Unopiù teak only comes from certified, guaranteed, government controlled plantations, where each tree cut is replaced by a new one.

Polished mahogany

Sapelli mahogany is well known as a very solid, compact and easy to work material that for centuries has been used for fine furniture, luxury flooring and musical instruments. Its colouring has a strong visual impact and a grain interlaced with elegant shades from reds to dark browns that tend to darken over time. Even though it is naturally resistant to climatic conditions, the mahogany used by Unopiù is polished to bring out its elegance, making it pleasing to the touch and perfectly suited to even the most demanding uses.

Nordic pine

Unopiù strutures are made in top quality nordic pine. This wood is particularly resistant and durable since it comes from trees growing in cold climates that can efficiently undergo pressure treatment in autoclave to 10 atmospheres.
The life of pressure treated quality wood is moreorless limitless, in that it is immune to insect attack, mould, fungus and the elements.

Iroko

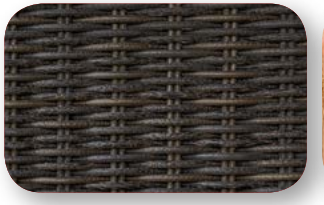
Iroko is a wood with numerous properties: besides its remarkable resistance to external stress and extreme conditions, it is characteristically manageable and easy to work. Its iridescent reflections are extraordinary. The chromatic nature of the younger wood varies from a strong yellow with shades of gold, to yellow brown, shades which tend to darken with age reaching an elegant final result with light-dark variagations. Commonly known as an "oily wood" due to its high resistance to water and humidity, iroko has excellent durability because its strength guarantees stability, solidity and resistance to distortion.

Peperino

Peperino is a very ancient stone of vulcanic origin that is especially found in central Italy. It was used by both the Etruscans and the Romans.
It is a fascinating easily worked and durable stone that is particularly weather resistant. The most common colour is grey but there is also a more valuable pink version. The peperino used by Unopiù is simply smoothed and the surface waterproofed.

Synthetic cord

Some years ago Unopiù introduced handwoven polyolefin cord, a modern ecological material that guarantees both high performance and resistance to extreme weather. It also has a warmer aesthetic compared to synthetic fibre, both physically and visibly bringing to mind the softness of natural cord. Handwoven polyolefin cord offers the characteristics of the very best natural textiles like softness, pleasantness to the touch, and is practical but also has the durability of synthetic textiles. It has a new aesthetic and functional role with infinite possibilities of colour nuances and mélanges that produce a product with fine details and a wonderful finish.



Synthetic fibre

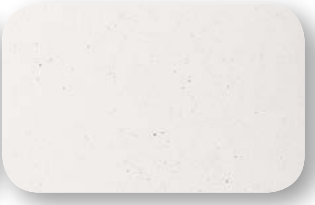
Unopiù patented WaProLace® fibre, a last generation synthetic material that is durable outdoors, maintaining its colour and characteristics even under rainy, salty, chlorine, mould, parasite, fungal, bacterial and sun cream conditions. Biodegradable and recyclable, WaProLace® is light, tactile, doesn't absorb liquids, doesn't stain, is antistatic and easy to clean. It is also resistant to extreme winter conditions, as it is not affected by changes in temperature.

Leather

The leather used by Unopiù is hand worked according to an ancient Tuscan tradition: "vegetable tanning" which transforms raw hides into leather through the use of tree tannins, respecting nature and giving the leather precious unique and natural characteristics. The natural capacity of leather to age and change over time makes each product an exclusive and unrepeatable item, a Made in Italy masterpiece that is particularly soft and silky to the touch, thanks to the characteristic "bottalatura" technique.
The excellent hand stitching of Tuscan artisans completes the product design, incorporating precious design details.

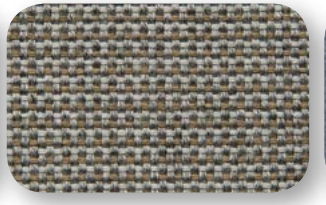
Iron and Steel

Unopiù iron furniture is handmade and hand forged, as in times past. With galvanization the iron is treated with a technically superior type of painting. More ecological, because it eliminates the volatile part of the paint made up of polluting solvents and thinners, more efficient because it gives stronger cover, as well as producing a more elegant finish. Stainless steel is a material with exceptional technical and aesthetic characteristics and is extraordinarily durable.
The modern fascination for steel unites perfectly with its extreme versatility.



Aluminium

Aluminium is one of the most used metals, thanks to the combination of its excellent properties, including lightness and ductility. It also guarantees good protection from corrosion and requires limited maintenance over the years.



Fabrics

Unopiù offers a vast range of textiles resistant to sunlight and adverse weather conditions: a wide range of 40 colours of different weights and finishes allowing the creation of infinite chromatic combinatons between seat, backrest and decorative cushions. These are 100% acrylic fabrics, solution dyed with stainproof and mouldproof fibres which stand out for their softness, freshness and pleasantness to the touch. Waterproof is a unique upholstery fabric composed of polypropylene and polyester. It has a familiar, natural and elegant look thanks to its checked pattern. It is easy to clean with a machine wash or with mild soap, permitting easy removal of mould thanks to its strong resistance and permeability to liquids.
It has a stainproof and waterproof finish resistant to 15 intensive washes.

"Velluto"

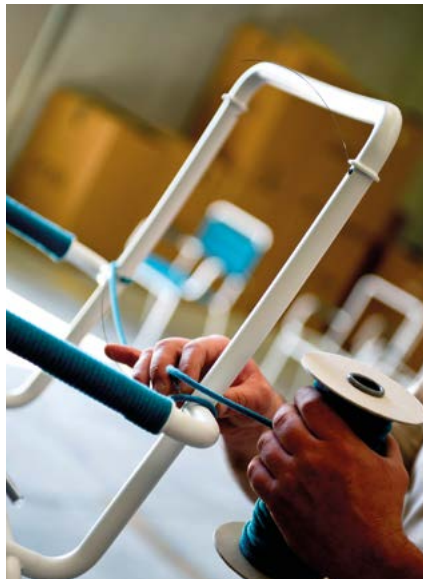
Unopiù's new velluto fabric is a unique line created through research into recycled plastic by manufacturer Fischbacher. It is a noble, top of the range collection of cushionware on demand for sofas, armchairs and sunloungers in 14 different extremely elegant and refined shades.
It is a true velvet to the touch, warm, delicate and soft but in fact 70% of the thread used comes from PET recycled bottles. This is a top quality ecological product that is weather and light resistant, flameproof and suited to any environment, internal or external, both public and private

MANUFACTURE

All Unopiù furnishings stand out for the excellent quality of their raw materials, selected from the very best to withstand extreme climatic conditions, as well as for the craftsmanship, the refinement of the design and for Italian creativity. Unopiù furnishings are the fruit of over forty years' experience that has always sought beauty and harmony among the wisest and most masterful artisans as well as an innovative spirit which transforms into avantgarde production techniques. In this way unique products are created that are longlasting and keep their value over the years.

In order to satisfy every aesthetic need the range goes from a more traditional style to the contemporary, from teak to metal, from synthetic fibre to cord, maintaining the quality of design, the excellence of the materials and the durability of the products unchanged.

All materials chosen by Unopiù are subject to careful analysis to ensure optimum manufacture, guaranteeing aesthetic merit as well as technical quality: full profiles, manufacture with concealed screws, perfect invisible joints are characteristics which even at a first glance confirm the undisputed quality of the final product.



INNOVATION

Our ambition is to create truly unique personal and exceptional environments where the most precious moments of life can be savoured whether alone or in company. From the very beginning Unopiù has sought to continually update the world of outdoor furnishing, uniting style, innovation, research and passion. For this reason every product launched on the market is the fruit of a concept whose roots are consolidated in decades of history.

The choice of innovative materials and manufacture for the outdoor market, like for example in the C'est La vie or Solaire lines, bears witness to the determination to pursue continual innovation in conjunction with constant technological progress.

”Making traditional products in a new way: this is innovation”

PRODUCTS

Unopiù is the only company in the outdoor market that can supply any type of furnishing in any type of highly desired material and supply any type of design to suit any type of personal taste.
From teak to aluminium, from wrought iron to cord: from furniture created by top designers and modern lines, to more traditional and iconic furnishings. Unopiù is always there to help professionals find the ideal solutions for their clients.

up.contract@unopiu.com

There is an ever increasing number of reception venues operating in the luxury sector who rely on Unopiù to set up and furnish their outdoor areas, which have become an undisputed strong point of any professional activity. High class multiapartments, retail, hospitality, corporate and restaurants are the new fields of development where Unopiù gives of its best in aesthetics and style. Among our strong points are: know-how and acknowledged competence, the unique ability to integrate outdoor furnishing and architecture, a solid structure where tailor made projects, project management and logistics are perfectly integrated along with the vast range of products and the attention to every detail.

SALES NETWORK

Unopiù owns numerous stores and franchisers in Italy and worldwide.

The flagship stores in Milan, Paris, Cannes, Madrid, and Munich lead the way in the outdoor furnishing sector. They are important points of reference, guiding taste and setting trends.
At Unopiù stores one can gain first hand knowledge of the quality of the wide range of products and take advantage of the personal assistance of dedicated staff, who are always ready to give advice and satisfy customer needs. The stores owned by Unopiù are supported by a constantly expanding network of selected agents and representatives covering 5 continents.
Our collaboration with partners in the most important international locations makes Unopiù an ever more widespread and acknowledged global brand, a prestigious signature in the luxury sector of Made in Italy.

PEVERO

SINUOUS TEAK

The Pevero collection is the exaltation of design applied to teak: this particular creation has round sections, Japanese style joints, a clean essential design, whose proportions and cushionware provide a complete and modern solution for any outdoor area where teak takes centre stage.

Appeal
The timeless warmth and softness of teak

P. 135

Identity
Clean and elegant lines for definite character

FIRE TABLE

ROMANTIC FIRE

A linear coffee table whose structure is in aluminium and teak that at its very centre encorporates an odds and ends container, an ice bucket or a Bio-ethanol brazier to heat and furnish any ambience.

Fiery
A flame for special evenings, either alone or in company

Characterizing
A special coffee table that matches diverse furnishings

EXI

FRESH VERSATILE STYLE

Inspired by country style chairs in wood and straw, reinterpreted in form and above all material, Exi is a complete, light and modern folding line in aluminium that suits any situation and any space.
The modularity of the backrests, the use of colours and its adaptability make this line perfect for less formal, more convivial situations. The laser cut decoration of the table tops and seats brings to mind traditional patterns with a more dynamic new look.

Leisure time
The comfortable lightness of aluminium

TLINE

DESIGN ADAM D. TIHANY - TIHANY PRODUCT DESIGN

TRADITION AND FUTURE MEET

Tline is a collection in white or graphite aluminium that is light and perfect for a clientele that desires ease of use as the main characteristic for outdoor furniture, yet remain fascinated by design. This exclusive Adam Tihany design presents an unmistakable perforated pattern that unites the traditional style of the 50s with modern, contemporary lines.

C'EST LA VIE

DESIGN MICHELE BÖNAN

TIMELESS STYLE AND CLASS

C'est la vie is a new collection inspired by joie de vivre, presenting refined classic and sophisticated style furnishings using a material of excellence like polished mahogany reminiscent of elegant English furniture, but also the special finish in ships of old and life on the open seas. Created for nautical, pool and luxury spa environments or elegant homes, this line has strong character and attention to every detail, with shiny stainless steel feet that finish and decorate each piece. This collection has a timeless elegant refined style with ample extremely comfortable seats, forever guaranteeing maximum comfort.

The Unopiù Colour Collection comprises 40 different fabrics with different colours weaves and weights. Thanks to the vast selection of carefully chosen shades one can satisfy any possible furnishing desire, a wide selection of matching colours offers the option of creating wonderful unique personal environments.
Designed for outdoor use, these solution dyed fabrics with the very latest manufacturing techniques are durable, stainproof, mouldproof, breathe and are particularly resistant to ultra violet rays. They all offer the same softness to touch as natural fibres.
The new waterproof fabric is the only one made of polypropylene and polyester. The square weave creates natural elegance, is 100% waterproof and can be either hand or machine washed.

VELLUTO

Unopiù's new velluto fabric is a unique line created through research into recycled plastic by manufacturer Fishbaker. It is a noble, top of the range collection of cushionware on demand for sofas, armchairs and sunloungers in 14 different extremely elegant and refined shades. It is a true velvet to the touch, warm, delicate and soft to touch but in fact 70% of the thread used comes from PET recycled bottles. This is a top quality ecological product that is weather and light resistant, flameproof and suited to any environment, internal or external, both public and private.

SOLAR SHOWER

SOLAR WATER

A modern garden shower in polyethylene with mixer, foot shower, ample 250 mm showerhead and okumè shower tray. The solar collector (Hot Ball) can be placed near the shower or on the roof and is in solution dyed black coloured resin and aluminium (registered patent) with a 40 litre capacity. It is shockproof and limescale proof and for this reason requires no maintenance. The water can be heated either by solar power or electricity.

OUTDOOR CARPETS

HANDCRAFTED, INNOVATIVE AND SUSTAINABLE

Our collection of ecological 100% recycled PET carpets woven on hand looms is inspired from the very oldest Indian wool and silk carpet making traditions. The continuous polyester thread is produced by recycling ordinary PET bottles, collected and sent for recycling in order to create a handmade, innovative, sustainable product.

Carpet in PET
Made on a hand loom, dark grey version

Recycled PET

PET bottles are collected after use, separated by colour, washed and industrially ground. They are reduced to flakes that are melted and transformed into polymer which is then extruded to produce thread.
The use of 100% recycled PET thread is a way of reducing pollution and improving the environment.

POTS

STYLISH ACCESSORIES

Unopiù stoneware pots are hand modelled using a mixture of different clays, following an ancient recipe kept secret for generations. These prepared items, treated with atoxic products, are then enamelled in different colours. Thanks to the baking process, which lasts over a week at temperatures over 1200°C, the pots resist icy temperatures. The cement planter in two different sizes is useful as a divider. The material is a mix of cement, water, sand and crushed stone, reinforced with natural fibre, and is thus ecological. The planters are suited to both indoor and outdoor use.

Grottaglie is a limited series of dinner, soup, and fruit plates in sets of three with the option of choosing from various original designs plus a salad bowl sold separately. Made in traditional ceramic, kiln baked 3 times, they are all handmade and painted in Puglia by local artisans with modern, lively, surprising designs that are exclusive to Unopiù.

THE ART OF THE TABLE

ITALIAN ELEGANCE

Accessories especially created to complete table settings and admire true Unopiù style. Elegant rigadin torsè Glasses and Candle Holders hand made and blown by master craftsmen using traditional murano glass methods. Each item is an example of Italian artisinal excellence.
An elegant table setting collection in 100% linen that, thanks to the wash-up treatment, maintains the lively colours.

STRUCTURES

ALL AVAILABLE OPTIONS TO CREATE NEW OUTDOOR ROOMS

URBN BALCONY

DESIGN MENEGHELLO PAOLELLI ASSOCIATI

MADE TO MEASURE DEHORS

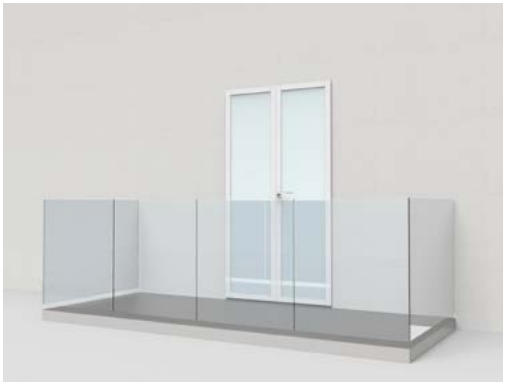
Urbn Balcony is a versatile modular system that interprets urban living with a new vision of quality, enabling the creation of multiple furnishing options to optimize the use of city balconies and terraces. The structure is in robust refined iroko wood and can be fixed to ceilings and walls. A series of accessories in white aluminium may be attached as you wish and to your liking.

Unique
Amplifying the potential of urban balconies

P. 254

Modular
Create a new outdoor room of quality

P. 14



In 2021 Urbn Balcony has been enhanced with new multifunctional storage furniture/ benches, a system of blinds, an elegant little tripolina and a mini series of folding tables and chairs created 100% for both storage in UB containers and use in limited outdoor areas.

roller blinds for ladders

clothesline and top in white aluminium

Your ideal composition
A versatile, customizable modular system to create new areas to be enjoyed all year round, even in small spaces like those of many urban balconies.

Table and chair both use Wood-Skin technology: a “wood fabric” that can be modelled is placed on the aluminium structure to form a seat, backrest or tabletop and thanks to its “structural fabric”, can be rolled up for storage. Urbn Balcony won a special mention in the German Design Awards.

MÉRIDIENNE

SUN&RAIN

The Méridienne pergola is made in powder coated aluminium in white gloss or matt graphite and has adjustable (0° to 75°) aluminium louvre roofing called “Sun & Rain“. The orientation of the louvres, with a manual adjustment rod, allows the regulation of brightness, the passage of air and optimum protection from the rain.
The structure can be widened by adding one or more standard modules of the same depth connected with the appropriate gutter connector kit. In snowy conditions louvres must be left open at 75°).
The Méridienne pergola can be enhanced with grilles and planters from the Solaire range, creating a veritable modular system that is versatile and adaptable to any requirement.

SHIBUYA®

DESIGN FERRUCCIO LAVIANI

SHADE IN MOVEMENT

Shibuya is the first mobile pergola in the world. Thanks to its wheels it has revolutionized the very principle of the structure by introducing the concept of dynamism. It is composed of two cubic units that offer various levels of mobility and flexibility, adapting to any requirements. It is possible to purchase a fixed unit that can be anchored to the ground or a mobile one with four wheels, or two units (pergola plus extension) with six wheels. In the last case it is possible to extend and move the pergola wherever you might wish. The structure is in powder coated aluminium and has blockable pirouetting wheels.
The mobile version has 10cm diameter wheels suited to any type of terrain. There are also blocking brackets for safety during high winds.
The pergola can be completed with various types of roofing and also enhanced with side curtains in microperforated fabric (40% polyester coated in 60% PVC) in hemp white.
In 2021 there is a new attached version: this option can also be made up of a single module or two modules, the second with wheels is extendable.

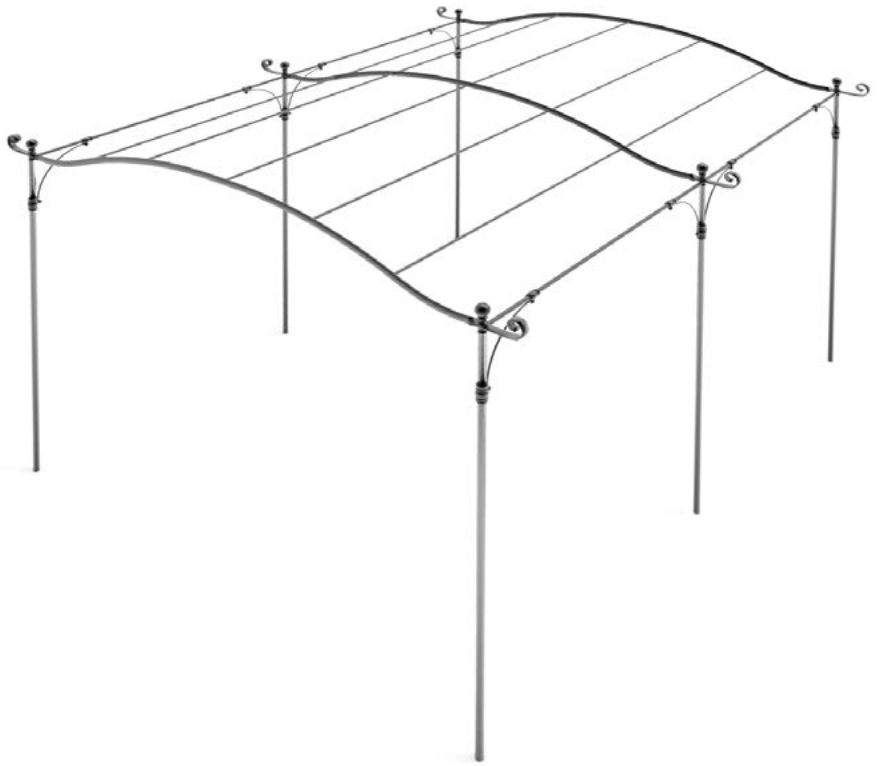
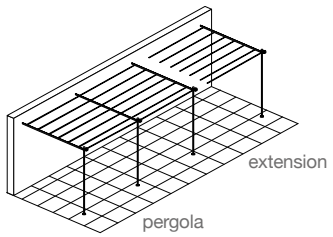
SOLAIRE

VERSATILE PERGOLA, INTERLACING ELEMENTS

The Solaire collection in powder coated galvanized iron recalls the traditional Italian and Mediterranean style of creating shade, “rooms” in the open, intimate areas, the decoration of outdoor environments. It is composed of a series of freestanding and attached pergolas, a classic pavilion and the roof garden system. It is totally versatile, offering possible “made to measure” areas to fulfill any furnishing wish or desire.
Attached or freestanding Solaire pergolas are available with both flat or curved roofs and can be widened with 186 cm extension modules. Various types of roofing are available: fixed shade, roll shade and bamboo shade. The Solaire pavilion, complete with steel wire as support for climbing plants, is either round or octagonal. It too can be enhanced with grille panels.



PERGOLAS



Dimensions given in the technical illustration refer to the maximum area occupied. The beam decoration overhangs the posts by approximately 20.5 cm in attached pergolas and by 18.5 cm in freestanding ones.

Posts are Ø 3 cm H 250 cm.
Thus the wall height of the curved attached pergola is:
- 280 cm for models 135 cm deep;
- 290 cm for models 220 cm deep
- 310 cm for models 320 cm deep.

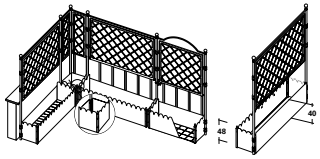
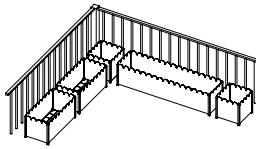
	109 x 45	FARS109
	157 x 45	FARS157
	181 x 45	FARS181

Freestanding Solaire planters must only be used with posts, grilles and the other accessories suggested on these and previous pages. 4 aluminium couplings Ref. G33NC, are necessary for fixing to posts, making the length of the planters 37, 109, 157 e 181 cm and respectively compatible with 30, 102, 150 e 174 cm grilles.
A 42.5 x 42.5 cm corner unit is also available.



Freestanding planters can only be used as autonomous units and although compatible with items of the Collection, they cannot be affixed to them. Therefore they must be used as separate features or where grilles have already been installed.



MATERIALS

Powder coated galvanized iron graphite

TIBISCO

THE FASCINATION OF TRADITION

Tibisco is a line of dramatic pergolas and pavilions made in powder coated galvanized iron in graphite. The pergola has a decorated front beam and is available in attached and freestanding verions that can be extended. It comes in different depths and widths and can be enlarged with extension modules single 186 cm and double 372 cm. Proposed roofing: polycarbonate sheeting, fixed shade, sliding shade and bamboo shades.
The pavilion, whose front beam is also decorated, found inspiration modelled on a structure from an ancient Cistertian monastery. The structure can be enhanced with spandrels and decorations at the base of the posts and with a waterproof white shade cover (39% polyester coated with 61% PVC).

ORANGERIE

CLASSICALLY INSPIRED GREENHOUSE

The Orangerie greenhouses, available in two models to satisfy any spatial requirement, are both available in either attached or freestanding versions. They are in powder coated galvanized iron with polycarbonate roofing and come with a door and a window.
The structures can be enhanced with supplementary door and window panels.

GREENHOUSES

FREESTANDING GREENHOUSE

	Greenhouse with polycarbonate roofing, 1 window and 1 door with polycarbonate side panelling	SAU33P	W 375 D 375 H 300

WINDOWS-DOORS

Supplement for additional window panel with polycarbonate panel (for SAU33P, SAU34P, SAD32P, SAD42P)	SPFSOR
Supplement for additional door panel with polycarbonate panel (for SAU33P, SAU34P, SAD32P, SAD42P)	SPPSOR
Supplement for additional window panel (for SAU215, SAU285, SAU355 SADSX215, SADDX215, SAD-SX285, SADDX285, SADSX355, SADDX355)	SUPFINSER

The request for additional windows and doors must be made at the time of ordering in order to substitute fixed panels. The above articles refer to the cost of the relative additions and vary according to whether the greenhouse chosen has polycarbonate side panelling included or not. Orangerie greenhouses have stainless steel nuts and bolts. They come complete with transparent polycarbonate 6 mm thick roofing and can be ordered with or without the transparent 3 mm thick polycarbonate side panelling (should you desire glass). The door is a double door (110 x 202 cm) and the window (110 x 100 cm) is top hinged and both can be installed on either side.
For Ref. SAU33P - SAU33 the temporary weight overload is 40 kg/m².
For Ref. SAD32P - SAD32 - SAU34P - SAU34 - SAD42P - SAD42 the temporary weight overload is 20 kg/m².

NAGI 凪

MULTIPURPOSE SOLUTIONS IN WOOD

The Nagi system goes beyond the world of Pergolas and structures: a unique design idea with a modern circular profile, handcrafted and assembled with perfect invisible joints creating a world of new configurations. Anything is possible with the Nagi system: from attached to freestanding pergolas, to covercars, to made to measure pergolas.
It is also possible to personalize your pergola choosing from various types of roofing, including the more sophisticated version with solar lighting, as well as various accessories and grilles of different dimensions with elegant striped patterns, either perpendicular or diagonal.

FINISH
All structures are treated and painted in teak colour.

MATERIALS

Treated Nordic lamellar pine

FPC certified by HOLZ FORSCHUNG AUSTRIA

Beams and posts are in solid wood for structural use in compliance with EN 14081-12011 in accordance with our FPC (Factory Production Control) certificate CE 1359-CPR-0510.

UNOPIÙ COLOUR & CARE

UNOPIÙ COLOUR

To characterize an ambience with different tones, pandering to one's own taste and furnishing needs, use Unopiù Colour water based paints. From natural tones like teak and dark walnut to true colours: white, graphite and English green.

Tin Unopiù Colour "Transparent" 2.5 litres	Dark walnut	UCNS
	Teak	UCP
Tin Unopiù Colour "Pittura" 2.5 litres	White	UCB
	Graphite	UCG
	English green	UCV

Unopiù pays particular attention to protocols adopted for the treatment of wood, using substances without chrome or arsenic, substances prohibited by the norms of environmental protection. All wood structures photographed in the Catalogue have been treated with Unopiù Colour.

CARE

WAPROLACE AND SYNTHETIC FIBRE CLEANING KIT

Composed of a special nonfoam detergent that removes dirt and restores the look of the fibre and also a protective spray that makes the furniture last longer, augments the plastification and maintains the flexibility of the fibre. The UV filter also maintains the condition and lengthens life as well as helping to prevent staining. This may also be used on iron, stone, cord in fabric and aluminium to clean and better maintain the product.

KIT WaProLace® and synthetic fibre cleaning	KITCARESURF

TEAK MAINTENANCE

The kit is composed of a detergent and a protection for teak. The detergent cleans and restores, lightening the colour of the grey teak. It is water based and also contains a bleaching agent that restores the original colour of the teak. Our teak protection is easy to apply and maintains the original "honey" colour of the teak longer. It lasts four times longer than teak oil and twice as long as a teak sealer, leaving a more beautiful and natural colour that isn't oily.

Cleaning kit for teak	KITCARETEAK
Tin of teak oil 0.5 lt	OLTEAK05

DAFNE

SHELTER BY DESIGN

The Dafne awning is classic in style yet reflects both urban and country environments. It is available in two models and various sizes. It gives optimum protection from rain, is made in powder coated galvanized iron in graphite and has embossed polycarbonate roofing.

SALENTO

THE PERFECT SHADE

The Salento collection offers a series of umbrellas with side support shafts. The most contemporary model unites the efficiency of an umbrella with the latest generation sun shade. The shade can be stored in the protective casing.
The shade closes mechanically by means of remote control or manually rolled with a winch and manual adjustment rod. A more traditional square model is also available with an aluminium side shaft in graphite, white or wood finish, with mechanical parts in top quality stainless steel. It is easily opened by means of a winch.

	Set of 6 tiles 50 x 50 in pebble concrete (for OMABALB, OMABALG OMABALL)	BAOMCAL
	Taupe coloured square umbrella shade cover	COOMABALL

Hardware stainless steel AISI 304. Inclination adjustment advisable from 5° to 20°. Wind-resistant to 45 k/hr. In the case of stronger winds it is advisable to close the shade. The balance and the angle of the umbrella are guaranteed by 10 concrete blocks (size 50 x 10 x 16.5 cm, weight 18 kg each) sold separately, which are inserted into the base plate.
The umbrella structure also has holes for plugs to fix to the ground. The base plate comes with adjustable feet and can be used to hold decorative articles like pot-plants or planters, which besides giving greater stability provide added attraction.

The balance and angle of the umbrella is guaranteed by 4 concrete tiles (50 x 50 cm approx. 20 kg each) which are inserted into the base. These tiles (Ref. BAOMCAL) are offered separately from the kit as they are easily found in any building yard or garden centre. The umbrella base can also be used as a stand for pots and planters increasing stability while providing added attraction.

LIPARI

MULTIFUNCTIONAL PRACTICALITY

The rich collection of Lipari umbrellas offers the choice of various shapes, colours, materials and bases to better suit the shade needs of any outdoor area. According to choice you may choose the model with the aluminium or wood central shaft and a stone, stainless steel or galvanized iron base as well as the various sized shapes available either square, rectangular or round. The shade is in 100% acrylic fabric in off white, cord, caffè, red or dove grey.
The round Lipari bases (Adolini Design Studio) in concrete with an iroko wood table adjustable to four positions has steel hardware and provides practical new uses for the classic garden umbrella, transforming it into an ideal new relaxation area that suits any model of Unopiù sunlounger or furnishing.
